Section 3.4.2.1 (2018-02-05). The `cosso` package is not installable on all operating systems supported by `R`. The culprit appears to be the `Rglpk` package on which `cosso` depends. The Comprehensive R Archive Network's CRAN Package Check Results on 2018-02-05 has an `ERROR` for `r-release OS X x86_64 El Capitan`. Until this error is rectified there are likely to be problems with analyses that use `cosso`.
