

## CURRICULUM VITAE

August 2021

**Name:**

Matthew Paul Wand PhD FAA

**Postal Address:**

School of Mathematical and Physical Sciences,  
University of Technology Sydney,  
P.O. Box 123,  
Broadway NSW 2007,  
Australia

**E-mail Address:**

matt.wand@uts.edu.au

**Web-site:**

<http://matt-wand.utsacademics.info>

**Current Position:**

Distinguished Professor of Statistics,  
School of Mathematical and Physical Sciences,  
University of Technology Sydney.

**Previous Positions Held:**

2007-2010 Research Professor in Statistics, School of Mathematics and Applied Statistics,  
University of Wollongong, Australia.

2003-2006 Professor of Statistics, School of Mathematics and Statistics, University of New  
South Wales, Sydney, Australia.

1997-2002 Associate Professor in Biostatistics, School of Public Health, Harvard University,  
U.S.A.

1994-1997 Senior Lecturer in Statistics, Australian Graduate School of Management, Univer-  
sity of New South Wales, Sydney, Australia

1992-1994 Lecturer in Statistics, Australian Graduate School of Management, University of  
New South Wales, Sydney, Australia

1990-1992 Visiting Assistant Professor, Rice University, Houston, U.S.A.

1989-90 Assistant Professor, Texas A&M University, U.S.A.

1989 (January – May) Visiting Assistant Professor, Texas A&M University

**Date and Place of Birth:**

23rd September, 1963 in Wollongong, New South Wales, Australia.

**Citizenship:**

Australian

**Family:**

Married to Handan; son Declan, daughter Jaida.

**Education:**

1989 Doctor of Philosophy, Australian National University  
(Supervisor: Professor Peter Hall AO FAA FRS FASSA NAS)

1986 Bachelor of Mathematics (Honours Class I) and University Medal,  
University of Wollongong

#### Awards and Fellowships:

- 2016 Fellow of the Australian Mathematical Society
- 2013 Pitman Medal in recognition of outstanding achievement in, and contribution to, the discipline of Statistics, Statistical Society of Australia
- 2013 Chancellor's Medal for Exceptional Research, University of Technology Sydney
- 2013 Hannan Medal for research in statistical science, Australian Academy of Science
- 2008 New South Wales Scientist of the Year Awards Category Winner (Mathematical Sciences)
- 2008 Fellow of the Australian Academy of Science (FAA)
- 2007 Fellow of the Institute of Mathematical Statistics
- 2002 Mentoring Award, Harvard School of Public Health
- 2000 Fellow of the American Statistical Association
- 1997 Moran Medal for Statistical Science, Australian Academy of Science
- 1986 Austin Keane Memorial Prize, University of Wollongong
- 1985 S.A. Senior Prize, University of Wollongong
- 1985 Statistical Society of Australia (N.S.W. Branch) Prize

#### Current Research Interests:

Expectation propagation, Variational approximations, Graphical models, Generalised linear mixed models, Message passing algorithms, Nonparametric regression, Real-time data analysis, Semiparametric regression modelling, Spatial statistics, Monte Carlo methods, Computational statistics, Analytics and data science.

#### Books:

1. Harezlak, J., Ruppert, D. and Wand, M.P. (2018). *Semiparametric Regression with R*. New York: Springer.
2. Ruppert, D., Wand, M.P. and Carroll, R.J. (2003). *Semiparametric Regression*. New York: Cambridge University Press. (4317 copies sold as of December 2018; not including library platform sales.)
3. Wand, M. P. and Jones, M. C. (1995). *Kernel Smoothing*. London: Chapman and Hall.

#### Statistics Methodology and Theory Refereed Journal Articles:

1. Hughes, D.M., Garcia-Finana, M. and Wand, M.P. (2021). Fast approximate inference for multivariate longitudinal data. *Biostatistics*, in press.
2. Maestrini, L. and Wand, M.P. (2021). The Inverse G-Wishart distribution and variational message passing. *Australian and New Zealand Journal of Statistics*, in press.

3. Menictas, M., Nolan, T.H., Simpson, D.G. and Wand, M.P. (2021). Streamlined variational inference for higher level group-specific curve models. *Statistical Modelling*, in press.
4. Hall, P., Johnstone, I.M., Ormerod, J.T., Wand, M.P. and Yu, J.C.F. (2020). Fast and accurate binary response mixed model analysis via expectation propagation. *Journal of the American Statistical Association*, **115**, 1902–1916.
5. Chen, W.Y and Wand, M.P. (2020). Factor graph fragmentation of expectation propagation. *Journal of the Korean Statistical Society*, **49**, 722–756.
6. Nolan, T.H., Menictas, M. and Wand, M.P. (2020). Streamlined computing for variational inference with higher level random effects. *Journal of Machine Learning Research*, **21(157)**, 1–62.
7. Nolan, T.H. and Wand, M.P. (2020). Streamlined solutions to multilevel sparse matrix problems. *ANZIAM Journal*, **62**, 18–41.
8. McLean, M.W. and Wand, M.P. (2019). Variational message passing for elaborate response regression models. *Bayesian Analysis*, **14**, 371–398.
9. Maestrini, L. and Wand, M.P. (2018). Variational message passing for Skew t regression. *Stat*, **7**: e196, 1–11.
10. Pham, T.H. and Wand, M.P. (2018). Generalised additive mixed model analysis via `gammSlice`. *Australian and New Zealand Journal of Statistics*, **60**, 279–300.
11. Kim, A.S.I. and Wand, M.P. (2018). On expectation propagation for generalised, linear and mixed models. *Australian and New Zealand Journal of Statistics*, **60**, 75–102.
12. Liu, S.H., Bobb, J.F., Henn, B.C., Schnaas, L., Tellez-Rojo, M.M., Gennings, C., Arora, M., Wright, R.O., Coull, B.A. and Wand, M.P. (2018). Modeling the health effects of time-varying complex environmental mixtures: Mean field variational Bayes for lagged kernel machine regression. *Environmetrics*, **29**:e2504, 1–17.
13. Luts, J., Wang, S.S.J., Ormerod, J.T. and Wand, M.P. (2018). Semiparametric regression analysis via `Infer.NET`. *Journal of Statistical Software*, **87**, Issue 2, 1–37.
14. Wand, M.P. (2017). Fast approximate inference for arbitrarily large semiparametric regression models via message passing (with discussion). *Journal of the American Statistical Association*, **112**, 137–168.
15. Nolan, T.H. and Wand, M.P. (2017). Accurate logistic variational message passing: algebraic and numerical details. *Stat*, **6**, 102–112.
16. Ryan, L.M., Wand, M.P. and Malecki, A.A. (2016). Bringing coals to Newcastle. *Significance*, **13**, 32–37.

17. Rohde, D. and Wand, M.P. (2016). Semiparametric mean field variational Bayes: General principles and numerical issues. *Journal of Machine Learning Research*, **17(172)**, 1–47.
18. Delaigle, A. and Wand, M.P. (2016). A conversation with Peter Hall. *Statistical Science*, **31**, 275–304.
19. Kim, A.S.I. and Wand, M.P. (2016). The explicit form of expectation propagation for a simple statistical model. *Electronic Journal of Statistics*, **10**, 550–581.
20. Lee, C.Y.Y. and Wand, M.P. (2016). Streamlined mean field variational Bayes for longitudinal and multilevel data analysis. *Biometrical Journal*, **58**, 868–895.
21. Lee, C.Y.Y. and Wand, M.P. (2016). Variational inference for fitting complex Bayesian mixed effects models to health data. *Statistics in Medicine*, **35**, 165–188.
22. Dubossarsky, E., Friedman, J.H., Ormerod, J.T. and Wand, M.P. (2016). Wavelet-based gradient boosting. *Statistics and Computing*, **26**, 93–105.
23. Luts, J. and Wand, M.P. (2015). Variational inference for count response semiparametric regression. *Bayesian Analysis*, **10**, 991–1023.
24. Menictas, M. and Wand, M.P. (2015). Variational inference for heteroscedastic semiparametric regression. *Australian and New Zealand Journal of Statistics*, **57**, 119–138.
25. Neville, S.E., Ormerod, J.T. and Wand, M.P. (2014). Mean field variational Bayes for continuous sparse signal shrinkage: pitfalls and remedies. *Electronic Journal of Statistics*, **8**, 1113–1151.
26. Wand, M.P. (2014). Fully simplified Multivariate Normal updates in non-conjugate variational message passing. *Journal of Machine Learning Research*, **15**, 1351–1369.
27. Luts, J., Broderick, T. and Wand, M.P. (2014). Real-time semiparametric regression. *Journal of Computational and Graphical Statistics*, **23**, 589–615.
28. Pham, T., Ormerod, J.T. and Wand, M.P. (2013). Mean field variational Bayesian inference for nonparametric regression with measurement error. *Computational Statistics and Data Analysis*, **68**, 375–387.
29. Huang, A. and Wand, M.P. (2013). Simple marginally noninformative prior distributions for covariance matrices. *Bayesian Analysis*, **8**, 439–452.
30. Menictas, M. and Wand, M.P. (2013). Variational inference for marginal longitudinal semiparametric regression. *Stat*, **2**, 61–71.
31. Wand, M.P. and Ormerod, J.T. (2012). Continued fraction enhancement of Bayesian computing. *Stat*, **1**, 31–41.

32. Ormerod, J.T. and Wand, M.P. (2012). Gaussian variational approximate inference for generalized linear mixed models. *Journal of Computational and Graphical Statistics*, **21**, 2–17.
33. Wand, M.P. and Ormerod, J.T. (2011). Penalized wavelets: embedding wavelets into semi-parametric regression. *Electronic Journal of Statistics*, **5**, 1654–1717.
34. Hall, P., Pham, T., Wand, M.P. and Wang, S.S.J. (2011). Asymptotic normality and valid inference for Gaussian variational approximation. *The Annals of Statistics*, **39**, 2502–2532.
35. Goldsmith, J., Wand, M.P. and Crainiceanu, C. (2011). Functional regression via variational Bayes. *Electronic Journal of Statistics*, **5**, 572–602.
36. Neville, S.E., Palmer, M.J. and Wand, M.P. (2011). Generalized extreme value additive model analysis via mean field variational Bayes. *Australian and New Zealand Journal of Statistics*, **53**, 305–330.
37. Wand, M.P., Ormerod, J.T., Padoan, S.A. and Frühwirth, R. (2011). Mean field variational Bayes for elaborate distributions. *Bayesian Analysis*, **6**, 847–900.
38. Faes, C., Ormerod, J.T. and Wand, M.P. (2011). Variational Bayesian inference for parametric and nonparametric regression with missing data. *Journal of the American Statistical Association*, **106**, 959–971.
39. Wang, S.S.J. and Wand, M.P. (2011). Using Infer.NET for statistical analyses. *The American Statistician*, **65**, 115–126.
40. Hall, P., Ormerod, J.T. and Wand, M.P. (2011). Theory of Gaussian variational approximation for a Poisson linear mixed model. *Statistica Sinica*, **21**, 369–389.
41. Chacón, J.E., Duong, T. and Wand, M.P. (2011). Asymptotics for general multivariate kernel density derivative estimators. *Statistica Sinica*, **21**, 807–840.
42. Samworth, R.J. and Wand, M.P. (2010). Asymptotics and optimal bandwidth selection for highest density region estimation. *The Annals of Statistics*, **38**, 1767–1792.
43. Marley, J.K. and Wand, M.P. (2010). Non-standard semiparametric regression via BRugs. *Journal of Statistical Software*, **37**, Article 5, 1–30.
44. Al Kadiri, M., Carroll, R.J. and Wand, M.P. (2010). Marginal longitudinal semiparametric regression via penalized splines. *Statistics and Probability Letters*, **80**, 1242–1252.
45. Naumann, U., Luta, G. and Wand, M.P. (2010). The curvHDR method for gating flow cytometry samples. *BMC Bioinformatics*, **11:44**, 1–13.
46. Ormerod, J.T. and Wand, M.P. (2010). Explaining variational approximations. *The American Statistician*, **64**, 140–153.

47. Kauermann, G., Ormerod, J.T. and Wand, M.P. (2010). Parsimonious classification via generalised linear mixed models. *Journal of Classification*, **27**, 89–110.
48. Pearce, N.D. and Wand, M.P. (2009). Explicit connections between longitudinal data analysis and kernel machines. *Electronic Journal of Statistics*, **3**, 797–823.
49. Ruppert, D., Wand, M.P. and Carroll, R.J. (2009). Semiparametric regression during 2003–2007. *Electronic Journal of Statistics*, **3**, 1193–1256.
50. Naumann, U. and Wand, M.P. (2009). Automation in high-content flow cytometry screening. *Cytometry, Part A*, **75A**, 789–797.
51. Duong, T., Koch, I. and Wand, M.P. (2009). Highest density difference region estimation with application to flow cytometric data. *Biometrical Journal*, **51**, 504–521.

#### Software Packages in the R Language:

1. Wand, M.P. (2020). **densEstBayes 1.0**. Density estimation via Bayesian inference engines. R package. <https://CRAN.R-project.org/package=densEstBayes>  
Roles: author and maintainer.
2. Harezlak, J., Ruppert, D. and Wand, M.P. (2021). **HRW 1.0**. Datasets, functions and scripts for semiparametric regression supporting Harezlak, Ruppert & Wand (2018). R package. <https://CRAN.R-project.org/package=HRW>  
Roles: author and maintainer.
3. Wand, M.P. and Yu, J.F.C. (2019). **glmmEP 1.0**. Generalized linear mixed model analysis via expectation propagation. R package. <https://CRAN.R-project.org/package=glmmEP>  
Roles: author and maintainer.
4. Pham, T. and Wand, M.P. (2019). **gammSlice 2.0**. Generalized additive mixed model analysis via slice sampling. R package. <https://CRAN.R-project.org/package=gammSlice>  
Roles: author and maintainer.
5. Wand, M.P., Luta, G. and Naumann, U. (2019). **curvHDR 1.2**. Filtering, also known as gating, of flow cytometry samples using the curvHDR method. R package. <https://CRAN.R-project.org/package=curvHDR>  
Roles: author and maintainer.
6. Wand, M.P. and Ripley, B.D. (2015). **KernSmooth 2.23**. Functions for kernel smoothing corresponding to the book: Wand, M.P. and Jones, M.C. (1995) "Kernel Smoothing". R package. <https://CRAN.R-project.org/package=KernSmooth>  
KernSmooth is an R base package. As of 14th September 2020 it has 134 reverse dependencies packages.  
Role: author.

7. Duong, T. and Wand, M.P. (2015). **feature 1.2.13**. Local inferential feature significance for multivariate kernel density estimation. R package.  
<https://CRAN.R-project.org/package=feature>  
 Role: author.
8. Ormerod, J.T. and Wand, M.P. (2020). **LowRankQP 1.0.4**. Low-rank quadratic programming. R package.  
<https://CRAN.R-project.org/package=LowRankQP> Role: author.

#### Contributions to R Packages:

1. The function `hdrbw()` for highest density region estimation bandwidth selection, within the R package:  
 Hyndman, R.J. (2009). **hdrcde 2.10**. Highest density regions and conditional density estimation. R package. <http://cran.r-project.org>

#### Vignettes for R Packages:

1. Wand, M.P. (2020). Vignette for the R package `densEstBayes`.
2. Wand, M.P. and Yu, J.C.F. (2018). Vignette for the R package `glmmEP`.
3. Luta, G., Naumann, U. and Wand, M.P. (2010). Vignette for the R package `curvHDR`.

#### Grants:

1. *Fast Approximate Inference Methods: New Algorithms, Applications and Theory*. Chief Investigator: M.P. Wand ; Partner Investigator G.W. Peters. Australian Research Council Discovery Project, 2018–2020. Amount: 386,828 Australian dollars.
2. *Australian Research Council Centre of Excellence for Mathematical and Statistical Frontiers* Australian Research Council Centre of Excellence, 2014–2020. Chief Investigators: P. Hall, P. Bartlett, N. Bean, K. Burrage, J. De Gier, A. Delaigle, P. Forrester, J. Geweke, R. Kohn, D. Kroese, K.L. Mengersen, A. Pettitt, P.K. Pollett, M. Roughan, L.M. Ryan, P. Taylor, I. Turner and M.P. Wand. Amount: 20,000,000 Australian dollars.
3. *Semiparametric Regression for Streaming Data*. Chief Investigator: M.P. Wand. Australian Research Council Discovery Project, 2014–2016. Amount: 375,000 Australian dollars.
4. *Fast Approximate Inference Methods for Flexible Regression*. Chief Investigators: M.P. Wand, J.T. Ormerod; Partner Investigator: Y.M. Wang. Australian Research Council Discovery Project, 2011–2013. Amount: 330,000 Australian dollars.
5. *Generalised Linear Mixed Models: Theory, Methods and New Areas of Application*. Chief Investigator: M.P. Wand. Australian Research Council Discovery Project, 2008–2010. Amount: 250,000 Australian dollars.
6. University of Wollongong Faculty of Informatics Research Development Scheme, 2008. Amount: 1,500 Australian dollars.
7. *Statistical Methods for Flow Cytometric Data*. Chief Investigators: M.P. Wand and I. Koch. Australian Research Council Discovery Project, 2005–2007. Amount: 301,000 Australian dollars.
8. *Semiparametric Regression and Environmental Health*. Principal Investigator: M.P. Wand. U.S. National Institute of Environmental Health Sciences, 2000. Amount: 482,284 U.S. dollars.
9. *New Spatial Analysis Methods for Improved Hazard/Risk Identification*. Joint with B. Wintle, J. Elith and D. Leonte. As part of the Australian Centre of Excellence for Risk Analysis, 2007. Amount: 38,300 Australian dollars.

10. *Development of Statistical Learning Methods for Classifying Antibodies from Flow Cytometry Data*. University of New South Wales Faculty Research Grants Program, 2003. Joint with I. Koch. Amount: 8,000 Australian dollars.
11. *Topics in Epidemiologically-based Environmental Risk Assessment*. Principal Investigator: M.P. Wand, with P. Catalano, B. Coull and L. Ryan. U.S. Environmental Protection Agency, 2000. Amount: 250,000 U.S. dollars.
12. *Advancement of Local Polynomial Smoothers*. Small Australian Research Council Grant, 1996. Amount: 12,500 Australian dollars.
13. *Topics in Nonparametric Curve Estimation*. (with S. Sheather and G. Eagleson) Small Australian Research Council Grant, 1995. Amount: 17,500 Australian dollars.
14. *Fast Computation of Multivariate Kernel Estimators*. Australian Graduate School of Management, 1993. Amount: 5,000 Australian dollars.

Citation Awards:

Member of the *Thomson Reuters Highly Cited Researchers 2001* list (one of 122 in Australia, 356 in Mathematics and 7 in Australian Mathematics; as of 7th August, 2013).

Ranked 23 among *Highly Cited Authors in Mathematics and Statistics 1991–2001* (*Science Watch*, May-June, 2002).

(source: *Web of Science isiknowledge.com*, 11th November 2020, for publications with 30 or more citations, with the exceptions of those having an asterisk (\*), which are currently not listed in *Web of Science* – or have apparent counting errors. The asterisked counts are predictions from the least squares regression fit based on citation count data for both *Web of Science isiknowledge.com* and *Google Scholar*

*scholar.google.com.au* counts for the articles in this table such that both counts are available. The prediction equation is

$$(\text{Web of Science citation count}) = -0.38896 + 0.49213(\text{Google Scholar citation count})$$

and has an  $R^2$  value of 97.00%.)

Teaching Experience:

*Harvard University*

2000, 2001, 2002 Methods I (for biostatistics doctoral students)  
1998, 1999, 2000 Statistical Inference II (for biostatistics doctoral students)  
1999, 2001 Smoothing in Biostatistical Research  
1999, 2002 Spatial Statistics

*University of New South Wales*

1992 MNGT 0230 (statistics for first year Masters of Business Administration students)  
1993 Total Quality Management (for open learning students)  
1993-4,6-7 Statistical Inference and its Applications (for management PhD students)  
1993-5 MNGT 0230, MNGT 0231 (statistics for first year Masters of Business Administration students)  
1996 Advanced Statistical Inference (for Finance PhD students)  
1997 Theoretical Mathematics (for Statistics and Finance PhD students)  
2003-2006 Higher Theory of Statistics (for second year undergraduate students)  
Statistics for Life and Social Sciences (for first year undergraduate students)  
Statistical Analysis of Microarrays (guest lecturer on third year course for Bioinformatics majors)  
2005-2006 Data Mining and Its Business Applications (guest lecturer on course for Masters of Statistics students)

*Rice University*

1990-91 and 1991-92 STATISTICS 310 (third year mathematical statistics)  
1990-91 and 1991-92 STATISTICS 431, STATISTICS 432 (graduate-level mathematical statistics)

*Texas A&M University*

1988-89 STATISTICS 211 (second year calculus-based statistics)  
1989-90 STATISTICS 211, STATISTICS 221 (second year engineering statistics)

*University of Technology Sydney*

2011-2012 Honours Seminar (Advanced data analysis)  
2013,2015 35393 Seminar (Statistics) (Advanced data analysis)  
2019,2020 37458 Advanced Bayesian Methods

*University of Wollongong*

2007-10 STATISTICS 902 (Honours-level advanced data analysis)

Post-Doctoral Fellow Supervision:

1. Dorota Toczydlowska (2018-2021).
2. Luca Maestrini (2018-).
3. Marianne Menictas (2018).  
Current position: Senior Data Scientist, Grubhub Inc., U.S.A.
4. Ye (Wilson) Chen (2016-2019).  
Current position: Lecturer, University of Sydney, Sydney, Australia.

5. Mathew McLean (2015–2017).
6. Christopher Oates (2015–2017).  
Current position: Professor of Statistics, University of Newcastle upon Tyne, Newcastle upon Tyne, United Kingdom.
7. David Rohde (2014–2015).  
Current position: Research Scientist, Criteo Inc., Paris, France.
8. Alan Huang (2012–2014).  
Current position: Lecturer, University of Queensland, Australia.
9. Jan Luts (2012–2013).  
Current position: Senior Data Scientist, Everis, Brussels, Belgium.
10. Tung Pham (2010–2011).  
Current position: Research Scientist in Machine Learning, VinAI Research, Vietnam.
11. John Ormerod (2008–2010).  
Current position: Associate Professor, University of Sydney, Australia.
12. Tarn Duong (2005–2007).
13. Long Ngo (2001–2002).  
Current position: Associate Professor of Medicine in Biostatistics, Harvard Medical School, U.S.A.
14. John Staudenmayer (2000–2001).  
Current position: Professor, Department of Mathematics and Statistics, University of Massachusetts, U.S.A.

#### Doctoral Student Supervision:

1. Tui Hiraka Nolan. PhD. University of Technology Sydney, 2020.  
Thesis title: *Variational Bayesian Inference: Message Passing Schemes and Streamlined Multilevel Data Analysis*.  
Current position: Research Associate, Medical Research Council Biostatistics Unit, University of Cambridge, U.K. (within the United Kingdom's Global Talent Visa programme).
2. Andy Sang Il Kim. PhD. University of Technology Sydney, 2019.  
Thesis title: *Semiparametric Regression via Message Passing Algorithms*.
3. Cathy Yuen Yi Lee. PhD. University of Technology Sydney, 2016.  
Thesis title: *Fast Approximate Inference for Longitudinal and Multilevel Data Analysis*.  
Current position: Senior Data Scientist, Google Inc., Zurich, Switzerland.
4. Shen Wang. PhD. University of Wollongong, 2016.  
Thesis title: *Variational Inference Machines for Semiparametric Regression*.
5. Marianne Menictas. PhD. University of Technology Sydney, 2015.  
Thesis title: *Variational Inference for Heteroscedastic and Longitudinal Regression Models*.  
Current position: Senior Data Scientist, Grubhub Inc., U.S.A.
6. Sarah Elizabeth Neville. PhD. University of Wollongong, 2013.  
Thesis title: *Elaborate Distribution Semiparametric Regression via Mean Field Variational Bayes*.
7. Nathan Douglas Pearce. PhD. The University of New South Wales, 2010.  
Thesis title: *Kernel Methods for Data Analysis*.  
Current position: Quantitative Trader, Volant Trading, Hong Kong.
8. John Thomas Ormerod. PhD. The University of New South Wales, 2008.  
Thesis title: *On Semiparametric Regression and Data Mining*.  
Current position: Associate Professor, University of Sydney, Australia.

9. Mikhail Peter Salganik. DSc. Harvard University, 2006.  
Thesis title: *Biomedical Applications of Smoothing and Feature Significance*.  
Current position: Associate Director, Biostatistician, Early Clinical Development, Pfizer Worldwide Research & Development, Pfizer Inc., Cambridge, Massachusetts, U.S.A.
10. Yihua Zhao. PhD. Harvard University, 2003.  
Thesis title: *General Design Bayesian Generalized Linear Models with Applications to Spatial Statistics*.  
Current position: Senior Associate Director, Boehringer Ingelheim Pharmaceuticals, Inc, U.S.A.
11. Bhaswati Ganguli. DSc. Harvard University, 2002.  
Thesis title: *Feature Significance and Geo-Additive Models*.  
Current position: Professor, Department of Statistics, University of Calcutta, Calcutta, India.
12. Erin Elizabeth Kammann (now Erin Kammann Lake). DSc. Harvard University, 2001.  
Thesis title: *Geoadditive and Robust Mixed Models*.
13. Jonathan Lloyd French, DSc. Harvard University, 2000.  
Thesis title: *Analysis of Environmental Health Data with Missing Values*.  
Current position: Fellow and Group Leader, Metrum Research Group, Tariffville, Connecticut, U.S.A.

Partial Doctoral Student Supervisions:

1. Gioia di Credico (PhD. University of Padua, Italy, 2019)
2. Hon Hwang (PhD. University of Technology Sydney, 2019)
3. Luca Maestrini (PhD. University of Padua, Italy, 2019)
4. Shelley Liu (PhD. Harvard University, U.S.A., 2017)
5. Jeff Goldsmith (PhD. Johns Hopkins University, U.S.A., 2012)
6. Chiara Bocci (PhD. University of Florence, Italy, 2010)
7. Simone Padoan (PhD. University of Padua, Italy, 2007)
8. Antonella Zanobetti (DSc. Harvard University, U.S.A., 2001)
9. Helen Parise (DSc. Harvard University, U.S.A., 1999)
10. Ilse Augustyns (PhD. Limburgs Universitair Centrum, Belgium, 1998)

Partial Masters Student Supervision:

1. Christian Tezza (Master of Quantitative Finance and Insurance, University of Turin, Italy, 2020)
2. Omar Ghattas (Master of Mathematics (Advanced), Australian National University, 2019)

Current Doctoral Students:

1. Virginia He.
2. Aishwarya Bhaskaran.
3. James Yu.

Masters Degree Thesis Supervision:

1. Eman Alfaifi. MSc. University of Technology Sydney, 2018.  
Thesis title: *Use of Expectation Propagation for Probability Density Function Estimation.*
2. James Yu. MSc. University of Technology Sydney, 2016.  
Thesis title: *Mean Field Variational Bayes for Poisson Response Penalised Wavelet Models.*  
Current position: Doctoral candidate, University of Technology Sydney.
3. Tui Nolan. MSc. University of Technology Sydney, 2015.  
Thesis title: *Accuracy Comparison of Variational Approximations Applied to Binary Response Regression Models.*  
Current position: Research Associate, Medical Research Council Biostatistics Unit, University of Cambridge, U.K. (within the United Kingdom's Global Talent Visa programme).
4. Andy Sang Il Kim. MSc. University of Technology Sydney, 2013.  
Thesis title: *Robust Real-Time Nonparametric Regression.*
5. Andrew Duncan Smith. MStats. The University of New South Wales, 2006.  
Thesis title: *Streamlined Error Covariance Matrix Estimation for Semiparametric Linear Mixed Models.*  
Current position: Senior Lecturer in Statistics, University of West of England, Bristol, United Kingdom.
6. John Thomas Ormerod. MStats. The University of New South Wales, 2005.  
Thesis title: *Low Rank Kernel Penalized Spline Support Vector Machines.*  
Current position: Associate Professor, University of Sydney, Australia.

#### Honours Thesis Supervision:

1. Cathy Yuen Yi Lee. BMath (Hons). University of Wollongong, 2009.  
Thesis title: *Multivariate Highest Density Difference Region Estimation*  
Current position: Senior Data Scientist, Google Inc., Zurich, Switzerland.
2. Sarah Elizabeth Neville. BMath (Hons). University of Wollongong, 2008.  
Thesis title: *Spatial Statistics and Dynamic 3D Graphics*
3. Jennifer Kate Marley. BMath (Hons). University of Wollongong, 2007.  
Thesis title: *Illustrations of Non-standard Bayesian Semiparametric Regression*  
Current position: Principal Data Scientist, Australian Bureau of Statistics, Canberra, Australia.

#### Senior Administrative Roles:

Head of Department of Statistics, The University of New South Wales, 2006.

Director of the Environmental Health Training Grant, Department of Biostatistics, Harvard University, 1999-2002.

#### Professional Activities:

Chair of Sectional Committee 1 (Mathematical Sciences) of the Australian Academy of Science for evaluation of fellowship nominations, May 2021 – May 2023.

Member of selection committee Australian Academy of Science 2021 Christopher Heyde Medal honorific award for excellence in mathematical sciences.

Member of selection committee Australian Academy of Science 2020 Heyde Medal honorific award for excellence in mathematical sciences.

Organiser of the Australian Research Council Centre of Excellence for Mathematical and Statistical Frontiers public lecture "The Sydney Data Science Industry" by Dr Eugene Dubossarsky at University of Technology Sydney, 21st November 2019 (70 participants).

Member of the Institute of Mathematical Statistics Committee on Special Lectures, 2019–2021.

Member of the Institute of Mathematical Statistics scientific programme committee on the 2021 Asia and Pacific Rim Meetings.

Member of Council, New South Wales branch of the Statistical Society of Australia, 2018–.

Member of the Institute of Mathematical Statistics Committee on Nominations, 2018–2020.

Member of the Australian Research Council Centre of Excellence for Mathematical and Statistical Frontiers Equity and Diversity Committee, 2018–present.

Member of the Australian Laureate Fellows Selection Advisory Committee, Australian Research Council, 2016.

Member of the Scientific Programme Committee for the 2014 Institute of Mathematical Statistics - Australian Statistical Conference, Sydney, July, 2014.

Member, Review Committee for the School of Mathematics and Physics, University of Queensland, September, 2013.

Member of the Institute of Mathematical Statistics Committee on Nominations, 2013–2014.

Member of Discipline Nomination Group (Mathematical Sciences) of the Australian Academy of Science, 2016-2018.

Member of Sectional Committee 1 (Mathematical Sciences) of the Australian Academy of Science for evaluation of fellowship nominations, 2013-2015.

Member of the Scientific Program Committee for the Graybill Conference, Colorado State University, June, 2010.

Member of selection committee for Australian Academy of Science 2011 honorific awards for excellence in mathematical sciences.

Member of the Scientific Program Committee for the International Workshop on Statistical Modelling, Cornell University, U.S.A., July, 2009.

Member of selection committee for Australian Academy of Science 2009 honorific awards for excellence in mathematical sciences.

Member of the Institute of Mathematical Statistics ad hoc committee on Asia and Pacific Rim Meetings, 2006–2007.

Member of the Advanced Coursework Advisory Committee of the International Centre of Excellence in Education of Mathematics, 2004–2007.

Organiser of the Australian Research Council Centre of Excellence for Mathematical and Statistical Frontiers 2019 Enabling Algorithms Theme Symposium ; 2-day symposium at University of Technology Sydney in June 2019 with over 25 participants.

Co-organiser of “Australian Mathematical Sciences Institute Symposium on Statistical Learning” (with Inge Koch); 2-day symposium at The University of New South Wales in October 2003 with over 100 participants.

Guest editor for special issue of *Advances in Bioinformatics* on “Recent Bioinformatics Advances in the Analysis of High Throughput Flow Cytometry Data” (2009).

Member of editorial board for the *Australian Mathematics Society Lecture Series* (2008-2013)

Associate Editor for *Electronic Journal of Statistics* (2007-2012)

Associate Editor for *Statistica Sinica* (2006-2010)

Associate Editor for *Australian and New Zealand Journal of Statistics* (2001- )

Associate Editor for *Biometrika* (1998-2003)

Associate Editor for *Journal of the American Statistical Association* (1995-2005)

Member of Statistics & Probability Screening Panel, US National Science Foundation, December 2000.

Referee for more than 50 journals.

Referee for grant proposals from several funding agencies including:

Australian Research Council  
Engineering and Physical Sciences Research Council (United Kingdom)  
National Science Foundation (U.S.A.)  
Research Grants Council of Hong Kong  
Research Council of Norway

Professional Society Memberships:

American Statistical Association  
Australian Mathematical Society  
Institute of Mathematical Statistics  
Statistical Society of Australia

Special Invited Lectures:

1. Distinguished Lecturer at the 4th Institute of Mathematical Statistics Asia-Pacific Rim Meeting: "Fast Approximate Inference for Arbitrarily Large Statistical Models via Message Passing" Hong Kong, June, 2016.
2. 2011 Lancaster Lecture; New South Wales Branch of the Statistical Society of Australia: "Regression in the Twenty Tens", March, 2011.
3. 2008 Knibbs Lecture; Canberra Branch of the Statistical Society of Australia: "Variational Approximation and Statistics", November, 2008.
4. Presidential Invited Address: "Semiparametric Regression and the Data Explosion" Australian Statistical Conference, Cairns, Australia, July 2004.

Keynote and Plenary Speakerships:

1. "Variational Message Passing for Elaborate Response Regression Models" Frontiers in Research and Practice in Statistics. Queensland University of Technology, Brisbane, Australia, October 2019.
2. "Frequentist Expectation Propagation". Computational and Statistical Interface to Big Data. King Abdullah University of Science and Technology, Saudi Arabia, March 2018.
3. "Fast Approximate Inference for Arbitrarily Large Statistical Models via Message Passing". Mathematical Science Symposium, The Mathematical Sciences Research Group, Auckland University of Technology, Auckland, New Zealand, November 2017.
4. "Fast Approximate Inference for Arbitrarily Large Statistical Models via Message Passing". The Second Conference on High Dimensional Statistical Inference in the Era of Big Data. Peking University, Beijing, China, May 2017.
5. "Semiparametric Regression for Streaming Data". Big Data Symposium. University of Ghent, Ghent, Belgium, May 2015.
6. "Real-time Semiparametric Regression". Bayes on the Beach. Caloundra, Australia; November, 2012.
7. "Real-time Semiparametric Regression". Australian Statistical Conference. Adelaide, Australia; July, 2012.
8. "Variational Bayes and Genome-Wide Association Studies". High Dimensional Statistics: Advances and Challenges. Nanyang Technological University, Singapore; May, 2011.
9. "Variational Approximations in Semiparametric Regression". New Zealand Statistical Association Conference. Wellington, New Zealand; September, 2009.

10. "Semiparametric Regression and the Computer Science Interface". Centro de Matemática Aplicada á Previsão e Decisão Económica Conference on *Advances in Semiparametric Methods and Applications*. Satellite meeting of International Statistical Institute meeting; Lisbon, Portugal; August, 2007.
11. "Penalised Spline Support Vector Classifiers: Computational Issues". International Workshop on Statistical Modelling. Sydney, Australia; July, 2005.
12. "Smoothing and Mixed Models". Euroworkshop on Nonparametric Models. Munich, Germany; November, 2001.

#### Short-Courses and Workshops:

1. "Semiparametric Regression with R". Sponsored by Statistical Society of Australia, Australia via teleconferencing, September–October 2020 (6 hours, 25 participants).
2. "Variational Approximations in Statistics"., Ludwig-Maximilians-Universität München, Munich, Germany, June 2020 (5 hours, 30 participants).
3. "Variational Approximations in Statistics"., University of Michigan, Ann Arbor, U.S.A., February 2020 (5 hours, 20 participants).
4. "Semiparametric Regression with R". Sponsored by Statistical Society of Australia Incorporated, Sydney, June 2019 (6 hours, 18 participants).
5. "Semiparametric Regression with R". Sponsored by Statistical Society of Australia Incorporated, Canberra, September 2018 (6 hours, 25 participants).
6. "Variational Approximations in Statistics"., Dipartimento di Scienze Statistiche, Università di Padova, Padua, Italy, March 2018 (5 hours, 15 participants).
7. "Variational Approximations in Statistics"., University of New South Wales, Sydney, Australia, May 2017 (5 hours, 25 participants).
8. "Variational Approximations in Statistics". Statistical Society of Australia Incorporated, University of Sydney, Sydney, Australia, September 2016 (5 hours, 26 participants).
9. "Semiparametric Regression with R". Professional Development Program, Joint Statistical Meetings, Chicago, U.S.A., August 2016 (6 hours, 35 participants).
10. "Real-Time Semiparametric Regression Through Variational Approximations". University of Ghent, Ghent, Belgium, May 2015 (5 hours, 40 participants).
11. "Semiparametric Regression". Statistical Society of Australia Incorporated, University of Technology Sydney, Sydney, Australia, July 2014 (5 hours, 18 participants).
12. "Variational Approximations in Statistics". Humboldt University, Berlin, Germany, December 2013 (6 hours, 25 participants).
13. "Semiparametric Regression". Queensland University of Technology, Brisbane, Australia, November 2012 (5 hours, 22 participants).
14. "Statistical Learning and Data Analysis". Industry Doctoral Training Centre in Mathematics, Sydney, Australia, July 2012 (5 days, 15 participants).
15. "Semiparametric Regression". Indiana University and Purdue University at Indianapolis, Indianapolis, U.S.A., June 2012 (5 hours, 33 participants).
16. "Semiparametric Regression". University of Western Australia, Perth, Australia, April 2012 (5 hours, 30 participants).
17. "Semiparametric Regression". Graybill Conference. Colorado State University, Fort Collins, Colorado, U.S.A., June 2011 (5 hours, 50 participants).

18. “Semiparametric and Nonparametric Regression”. Oberwolfach Seminars 2009. Mathematisches Forschungsinstitut Oberwolfach, Germany, October 2009 (5 days, 18 participants; jointly organised with R.J. Carroll and C. Crainiceanu).
19. “Semiparametric Regression”. New Zealand Statistical Association Conference. Wellington, New Zealand, September 2009 (5 hours).
20. “Advanced Data Analysis” Australian Mathematical Sciences Institute/ International Centre of Excellence for Education in Mathematics Summer School, University of Wollongong, January–February 2009 (26 hours over 4 weeks).
21. “Semiparametric Regression”. Commonwealth Scientific and Industrial Research Organisation: Mathematics and Information Sciences. Creswick, Victoria, Australia. November 2008 (5 hours).
22. “Bayesian inference using BRugs”. Australian Mathematical Sciences Institute/ Statistical Society of Australia Inc. Australian Statistical Conference 2008 Satellite Workshop: Computing with R; Melbourne; July 2008 (1½ hours).
23. “Semiparametric Regression”. Dipartimento di Scienze Statistiche, Università di Padova, Italy. February 2008 (6 hours).
24. “Modern Nonparametric and Semiparametric Inference”. Australian Bureau of Statistics; Canberra; October 2007 (3 hours).
25. “Semiparametric Regression; Classification; Support Vector Machines”. Complex Systems Beyond the Metaphor: Your Mathematical Toolset; The University of New South Wales; February 2007 (5 hours).
26. “Longitudinal Data Analysis” Australian Mathematical Sciences Institute Summer School; The University of New South Wales; February 2004 (3 hours).
27. “Semiparametric Regression” International Biometric Society, Eastern North American Region, 2004 Spring Meeting, Pittsburgh, U.S.A.; March 2004 (1 day).
28. “Semiparametric Regression” Department of Medical Epidemiology and Biostatistics, Karolinska Institutet, Stockholm, Sweden; March 2002 (3 days).
29. “Smoothing Techniques and Software” International Biometric Society, Eastern North American Region, 2001 Spring Meeting, Charlotte, North Carolina, U.S.A.; March, 2001 (2 hours).
30. “An Introduction to Kernel Regression” Faculty of Economics, University of Pompeu Fabra, Barcelona, Spain, February, 1994.

#### Other Invited Conference Presentations:

1. “Streamlined Variational Inference for Random Effects Models”. International Biometric Society Virtual Conference (August 2020).
2. “Streamlined Variational Inference for Random Effects Models”. Data Science Down Under. The University of Newcastle, Newcastle, Australia (December, 2019).
3. “Variational Message Passing for Elaborate Response Regression Models”, Joint Statistical Meetings, Denver, U.S.A. (July 2019).
4. “Frequentist Expectation Propagation”, Australian Research Council Centre of Excellence for Mathematical and Statistical Frontiers symposium on Statistical Methods for the Analysis of High-Dimensional and Massive Data Sets. Queensland University of Technology, Australia (January, 2019).
5. “Fast Approximate Inference for Arbitrarily Large Statistical Models via Message Passing”, Platinum Jubilee International Conference on Applications of Statistics, Department of Statistics, University of Calcutta, Kolkata, India (December 2016).

6. "Fast Approximate Inference for Arbitrarily Large Statistical Models via Message Passing", Peter Hall Memorial Conference, Department of Statistics, University of California, Davis, Davis, California, U.S.A. (October 2016).
7. "Peter Hall's Life Outside of Statistics", Professor Peter Hall Workshop, Australian National University, Canberra, Australia (September 2016).
8. "Peter Hall's Life Outside of Statistics", The 4th Institute of Mathematical Statistics Asia Pacific Rim Meetings, Hong Kong (June 2016).
9. "Real-time Semiparametric Regression". International Workshop/Conference on Bayesian Theory and Applications. Varanasi, India, January, 2013.
10. "Variational Bayesian Inference for Regression with Missing Data or Measurement Error". 2012 Centre for Mathematics Analysis Special Year on Inverse Problems. One-Day Seminar 4. Mathematical Sciences Institute, Australian National University, Australia; September, 2012.
11. "Variational Bayes and Genome-Wide Association Studies". International Biometric Society Australasian Region Conference. Kiama, New South Wales, Australia; December, 2011.
12. "Variational Inference for Regression with Missing Data". 2011 KSS International Conference on Statistics and Probability - The 40th Anniversary of the Korean Statistical Society. June, 2011, Busan, South Korea.
13. "Variational Bayes for Elaborate Distributions". Workshop of Recent Advances in Bayesian Computation. National University of Singapore, Institute for Mathematical Sciences. September, 2010, Singapore.
14. "Variational Approximations in Semiparametric Regression". Eleventh Annual Winter Workshop, University of Florida, Department of Statistics. Workshop on Semiparametric Methodology. January, 2009, Gainesville, Florida, U.S.A.
15. "Variational Approximations for Logistic Mixed Models". Ninth Iranian Statistical Conference, August, 2008, Esfahan, Iran.
16. "Parsimonious Classification via Generalised Linear Mixed Models". Taipei International Statistics Workshop, December 2006, Taipei, Taiwan.
17. "Identifying Regions of Differing Density Among Flow Cytometric Samples". Australasian Flow Cytometry Group, 29th Annual Scientific Meeting, August 2006, Sydney, Australia.
18. "Identifying Regions of Differing Density Among Flow Cytometric Samples". The Australian Statistical Conference/ New Zealand Statistical Association Conference 2006, Auckland, New Zealand.
19. "Penalised Spline Support Vector Classifiers". The Australian Statistical Conference/ New Zealand Statistical Association Conference 2006, Auckland, New Zealand.
20. "Statistical Methods for Flow Cytometric Data". 55th Session of the International Statistical Institute, 2005, Sydney, Australia.
21. "Statistical Learning for Statisticians". XXIIInd International Biometric Conference, 2004, Cairns, Australia.
22. "Subject-specific Curves for Longitudinal Data: Keeping it Simple and Computable". Biennial Conference of the International Biometric Society (Australasian Region) 2003, Canberra, Australia.
23. "The Mixed Model Revolution in Smoothing". International Biometric Society Eastern North American Region, Spring 2002 Meeting, Arlington, Virginia, U.S.A.
24. "Conditional Panel Designs for Surveillance Data". International Biometric Society Eastern North American Region, Spring 2000 Meeting, Chicago, Illinois, U.S.A.

25. "Cancer Mapping on Upper Cape Cod using Generalized Additive Models with a Bivariate Component". Joint Statistical Meetings, Baltimore, Maryland, U.S.A. (August, 1999)
26. "Penalized Spline Regression". Interface '98, Minneapolis, Minnesota, U.S.A. (May, 1998)
27. "Generalized Partially Linear Single-Index Models". XXII (VI International) Conference on Mathematical Statistics, Jachranka, Poland (June, 1996).
28. "Binned Kernel Estimators: Theory and Practice". New Directions in Smoothing, Australian National University, Canberra, Australia (June, 1994).
29. "Fast Computation of Multivariate Kernel Estimators". Statcomp '93, Wollongong, Australia (September, 1993).
30. "Comparison of Smoothing Parameterizations in Multivariate Curve Estimation". Conference of Texas Statisticians, Dallas, U.S.A. (April 1991).

#### Other Presentations:

"Streamlined Variational Inference for Random Effects Models", Department of Mathematics and Statistics, Macquarie University, Sydney, Australia (August, 2020).

"Variational Message Passing for Elaborate Response Regression Models", Department of Biostatistics, University of Michigan, U.S.A. (February, 2020).

"Frequentist Expectation Propagation", Research School of Finance, Actuarial Studies and Applied Statistics, Australian National University (March, 2018); Department of Statistics, National University of Singapore (November, 2018); School of Mathematics and Statistics, University of Melbourne (May, 2019).

"Fast Approximate Inference for Arbitrarily Large Statistical Models via Message Passing", Australian Research Council Centre of Excellence for Mathematical and Statistical Frontiers; Retreat 2015, Glenelg, South Australia (November, 2015); Department of Statistics, University of Macquarie (April, 2016); Department of Biostatistics, Columbia University, U.S.A. (October, 2016); Department of Statistics, Columbia University, U.S.A. (October, 2016); School of Mathematical and Physical Sciences, University of Technology Sydney (October, 2016); School of Mathematical Sciences Colloquium, University of Adelaide (March, 2017); School of Mathematics and Statistics, University of New South Wales (May, 2017); Department of Statistics, University of Leeds, United Kingdom (July 2018); Department of Statistics, Stanford University, U.S.A. (December 2018).

"Semiparametric Mean Field Variational Bayes" School of Mathematics and Statistics, University of Sydney (October, 2013); School of Mathematical Sciences, University of Adelaide (November, 2014); Research School of Finance, Actuarial Studies and Applied Statistics, Australian National University (March, 2015).

"Real-time Semiparametric Regression" School of Mathematical Sciences, University of Technology Sydney, (August, 2012); Department of Statistics, University of New South Wales (October, 2013).

"Variational Sparse Signal Regression" School of Mathematics and Applied Statistics, University of Wollongong, (May, 2012), School of Mathematics and Physics, University of Queensland, (May, 2012).

"Statistician in Variational Land" Statistics in Artificial Intelligence Laboratory, University of California at Berkeley, U.S.A. (October, 2011).

"Regression in the Twenty Tens" University of Technology Sydney (September, 2010).

"The curvHDR Method for Gating Flow Cytometry Samples" Health Informatics Research Centre, University of Wollongong (August 2010).

“Variational Bayesian Inference for Regression with Missing Data” School of Mathematics and Statistics, University of Western Australia (February, 2010); School of Mathematics and Statistics, University of New South Wales (March, 2010); Department of Statistics, Macquarie University (August, 2010); Department of Mathematical Sciences, University of Technology Sydney (November, 2010).

“Explaining Variational Approximations” Commonwealth and Industrial Research Organisation Mathematical and Information Sciences, Perth (February, 2010)

“Variational Approximations in Semiparametric Regression” School of Applied Mathematics and Statistics, Queensland University of Technology (May, 2009); School of Mathematics and Statistics, University of Sydney (September, 2009); Commonwealth and Industrial Research Organisation Mathematical and Information Sciences, Sydney (October, 2009); Institute of Mathematics, Ecole Polytechnique Fédérale de Lausanne, Switzerland (October, 2009), Goulburn 11 Meeting, Centre for Survey and Statistical Methodology, Goulburn (November, 2009).

“Variational Approximations in Statistics”. Department of Mathematics and Statistics, University of Melbourne (September, 2008).

“Semiparametric Regression and Graphical Models” Goulburn 7 Meeting, Centre for Survey and Statistical Methodology, Goulburn (July, 2008); Department of Statistics, Shiraz University, Iran (August, 2008); New South Wales Department of Primary Industry Retreat, Wollongong (October, 2008).

“Ideas on Building an International Research Profile” Research conference of the Applied Statistics Education and Research Collaboration. University of Western Sydney, Campbelltown (December, 2007).

“Highest Density Difference Region Estimation with Application to Flow Cytometric Data” Goulburn 4 Meeting, Centre for Survey and Statistical Methodology, Goulburn (July, 2007).

“Semiparametric Regression and the Computer Science Interface” Australian Capital Territory Branch of the Statistical Society of Australia, Canberra (February, 2007), University of Wollongong (October, 2007), National University of Singapore, Singapore (March, 2008).

“Parsimonious Classification via Generalised Linear Mixed Models” Fred Hutchinson Cancer Research Center, Seattle, U.S.A. (November, 2006).

“Fighting Cancer with Statistical Methods” The University of New South Wales’ Open Day for Talented Students in Mathematics (July, 2006).

“Feature Significance for Multivariate Density Estimation” Address to New South Wales Branch of the Statistical Society of Australia, (October, 2001); Fred Hutchinson Cancer Research Center, Seattle, U.S.A. (November, 2006).

“Penalised Spline Support Vector Classifiers: Computational Issues” Centre of Excellence for Mathematics and Statistics of Complex Systems, Melbourne (June, 2006), University of Sydney (September, 2005), University of Calcutta, India (September, 2005), Indian Statistical Institute, Calcutta, India (October, 2005).

“Statistical Methods for Flow Cytometric Data” The Centre for Immunology, Sydney, Australia (April, 2005), Burdwan University, India (September, 2005), University of Calcutta, India (September, 2005).

“Semiparametric Regression and the Data Explosion” Faculty of Science Seminar Series, The University of New South Wales (September, 2004).

“Penalised Splines and Reproducing Kernel Methods” Monash University (September, 2004), Hong Kong University of Science and Technology (December, 2004), University of Hong Kong (December, 2004).

“Statistical Learning for Statisticians” The University of New South Wales (October, 2003)

“Feature Significance in Geostatistics” The University of New South Wales (April, 2003)

“Towards General Design Bayesian Generalized Linear Mixed Models” The University of New South Wales (April, 2003), Australian National University (July, 2003), University of Sydney (September, 2003).

“Geoaddivitive Models” Memorial Sloan-Kettering Cancer Center, U.S.A. (April, 2001), University of Michigan, U.S.A. (November, 2000), Massachusetts Institute of Technology, U.S.A. (December, 2000).

“Smoothing and Mixed Models” Macquarie University, Australia (October, 2001) The University of New South Wales, Australia (November, 2001) University of Wisconsin, U.S.A. (December, 2001), University of Massachusetts, U.S.A. (May, 2002), Rice University, U.S.A. (October, 2002).

“Semiparametric Regression and Mixed Models” Yale University, U.S.A. (November, 1999).

“Semiparametric Regression in Environmental Health Research” University of Florida, U.S.A. (December, 1998), University of Rochester, U.S.A. (February, 1999).

“Penalized Spline Regression” University of North Carolina, U.S.A. (March, 1998).

“Smoothing: recent developments and applications” Harvard University, U.S.A. (October, 1996), Iowa State University, U.S.A. (November, 1996), University of Minnesota, U.S.A. (November, 1996). University of Technology Sydney, Australia, (May, 1997).

“Local Polynomial Variance Function Estimation” Monash University, Melbourne (November, 1995), Royal Melbourne Institute of Technology (November, 1995), Limburg University Central, Belgium (January, 1996), Catholic University of Louvain, Belgium (February, 1996), Lund Technical University, Sweden (August, 1996), University of Oslo, Norway (August, 1996), University of Illinois, U.S.A. (September, 1996), New York University, U.S.A. (October, 1996), Humboldt University, Germany (December, 1996).

“Generalized Partially Linear Single-Index Models” 1995 Institute of Mathematical Statistics Annual Meeting, Orlando, U.S.A. (August, 1995).

“Versatility of kernel smoothers” Macquarie University, Sydney (October, 1994), Australian National University (January, 1995), La Trobe University (March, 1995), Limburg University Central, Belgium (May, 1995), University of Newcastle (August, 1995).

“Accuracy of Binned Kernel Functional Approximations” 1994 Institute of Mathematical Statistics Annual Meeting, Toronto, Canada (August, 1994).

“Plug-in Bandwidth Selection for Local Least Squares Regression” University of Santiago de Compostela, Spain (January, 1994), Australian National University, Canberra (May, 1994).

“Fast Computation of Kernel Estimators”: University of Newcastle (June, 1993), 1993 Institute of Mathematical Statistics Annual Meeting, San Francisco, California (August, 1993), University of Santiago de Compostela at La Coruna, Spain (January, 1994).

“Recent Developments in Local Polynomial Kernel Regression”: Australian National University (October, 1992), The University of New South Wales (March, 1993).

“Multivariate Locally Weighted Least Squares Regression”: University of British Columbia (May, 1992), Institute of Mathematical Statistics-Western North American Region of the International Biometric Society, Western Regional Meeting, Corvallis, Oregon (June, 1992).

“Some Topics in Kernel Smoothing”: Rice University (January, 1992), University of Texas (February, 1992), Cornell University (February, 1992).

“Recent Developments in Nonparametric Curve Estimation”: (series of 3 lectures) National University of Singapore.

“Assessing and Improving the Flexibility of Kernel Estimators”: Rice University (September, 1990), Meeting *Trends in the Analysis of Curve Data*, Heidelberg, Germany (March, 1991), University of British Columbia (March 1991).

“Exact Mean Integrated Squared Error for Dependent Data”: North Atlantic Treaty Organization Institute of Advanced Studies conference on *Nonparametric Functional Estimation*, Spetses, Greece (August, 1990)

“Transformations in Density Estimation”: North Carolina State University (August 1989), Southern Methodist University (November 1989), University of Bath (January 1990), University of Glasgow (January 1990), New York University (February 1990), McGill University (March 1990), University of Heidelberg (April 1990).

“Minimisation of  $L_1$  Distance in Density Estimation”: Rice University (March 1989), Texas A&M University (April 1989), IBM Thomas J. Watson Research Center (July 1989), Rutgers University (July 1989).

#### Academic Visits:

1. Department of Biostatistics, University of Michigan, U.S.A.; February 2020 (1.5 weeks).
2. National Aeronautics and Space Administration Jet Propulsion Laboratory, California Institute of Technology, U.S.A.: August, 2019 (one week).
3. Department of Statistics, Stanford University, U.S.A.: December, 2018 (one week).
4. Department of Statistics, National University of Singapore, Singapore: November, 2018 (one week).
5. Department of Statistics, University of Leeds, UK: July–August, 2018 (two weeks).
6. Dipartimento di Scienze Statistiche, Università di Padova, Italy: March, 2018 (one week).
7. Computer, Electrical and Mathematical Science and Engineering Division, King Abdullah University of Science and Technology, Saudi Arabia: March, 2018 (one week).
8. Department of Statistics, Columbia University, New York, U.S.A.: October, 2016 (eight days).
9. Ladislaus von Bortkiewicz Chair of Statistics, Humboldt-Universität zu Berlin, Berlin, Germany: December, 2013 (two weeks).
10. Department of Statistics, University of Illinois at Urbana-Champaign, U.S.A.: June, 2012 (one week).
11. Department of Biostatistics, Indiana University School of Medicine, Indiana University and Purdue University at Indianapolis, U.S.A.: June, 2012 (one week).
12. Algorithms-Machines-People Laboratory, Department of Electrical Engineering and Computer Science, University of California at Berkeley, Berkeley, California, U.S.A.: October, 2011 (one week).
13. Department of Statistics, Colorado State University, Fort Collins, Colorado, U.S.A.: December, 2010 (one week).

14. Commonwealth Scientific and Industrial Research Organisation – Mathematics, Informatics and Statistics, Perth, Australia: February, 2010 (one week).
15. Institute of Mathematics, Ecole Polytechnique Fédérale de Lausanne, Switzerland: October, 2009 (one week).
16. Department of Statistics, University of Florida, Gainesville, Florida, U.S.A.: January, 2009 (one week).
17. Department of Statistics, National University of Singapore, Singapore: March, 2008 (one week).
18. Dipartimento di Scienze Statistiche, Università di Padova, Italy: February, 2008 (one week).
19. Fred Hutchinson Cancer Research Center, Seattle, U.S.A.: September, 2007 (one week).
20. Fred Hutchinson Cancer Research Center, Seattle, U.S.A.: November, 2006 (one week).
21. Indian Statistical Institute, Calcutta, India: October, 2005 (one week).
22. Department of Statistics, University of Calcutta, India: September, 2005 (one week).
23. Garvan Institute of Medical Research, Sydney, Australia: July–December, 2005 (one day a week for 5 months).
24. Department of Operations Research and Industrial Engineering, Cornell University, U.S.A.: July, 2001 (one week).
25. Center for Applied Statistics & Economics, Humboldt-Universität zu Berlin, Germany, December, 1996 (three weeks).
26. Department of Statistics, University of Illinois, U.S.A.: August–November, 1996 (five months).
27. Department of Mathematics and Statistics, Lund University, Sweden: July–August, 1996 (two months).
28. Institut de Statistique, Université Catholique de Louvain, Louvain-la-Neuve, Belgium: January–February, 1996 (six weeks).
29. Centre for Mathematics and Its Applications, Australian National University, Canberra, Australia: January, 1995 (one week).
30. Center for Statistics, Limburgs Universitair Centrum, Diepenbeek, Belgium: May, 1995 (three weeks).
31. Department of Operations Research and Industrial Engineering, Cornell University, U.S.A.: July, 1994 (two weeks).
32. Centre for Mathematics and Its Applications, Australian National University, Canberra, Australia: May, 1994 (one week).
33. Department of Statistics and Operations Research, University of Santiago de Compostela, Santiago, Spain: January, 1994 (two weeks).
34. Department of Statistics, University of British Columbia, Vancouver, Canada: May–June, 1992 (two months).
35. Department of Statistics, Open University, Milton Keynes, United Kingdom: May–June, 1991 (two months).
36. Department of Mathematics, National University of Singapore: April–May, 1991 (six weeks).
37. Institut für Angewandte Mathematik, Universität Heidelberg, Germany: April–May, 1990 (two months).

38. School of Computing Science, McGill University, Montreal, Canada: March, 1990 (one month).
39. Department of Operations Research and Industrial Engineering, Cornell University, U.S.A.: February, 1990 (one week).
40. Department of Statistics, University of Glasgow, United Kingdom: January, 1990 (two weeks).
41. Department of Statistics, University of Bath, United Kingdom: January, 1990 (two weeks).
42. Department of Statistics, University of North Carolina, U.S.A.: August, 1989 (one week).
43. Department of Operations Research and Industrial Engineering, Cornell University, U.S.A.: June–July, 1989 (two months).

**Other Activities:**

1. Manager, Maroubra United Girls Under 15 soccer team, 2012.
2. Manager, Maroubra United Girls Under 14 soccer team, 2011.
